My Portfolio

Top Rated Upwork Freelancer

Professional Summary

Data, ML & AI Engineer with hands-on experience building end-to-end data and AI pipelines : from ingestion to deployment. Skilled in cloud data platforms (AWS, Snowflake, BigQuery), MLOps (MLflow, Docker, CI/CD), and LLM integration (RAG, GPT-4o, Mistral, Llama 3). Focused on delivering scalable, production-ready systems that turn data into real business value.

Technical Skills

- **ETL & Data Pipelines:** Apache Airflow, PySpark, dbt, BigQuery, Snowflake, SQL (MySQL, PostgreSQL)
- **Cloud & MLOps:** AWS (S3, Bedrock), MLflow, CI/CD, Docker, Model Deployment & Monitoring
- **Machine Learning & Deep Learning:** TensorFlow, PyTorch, Keras, scikit-learn
- **NLP & LLMs:** RAG, OLLAMA, Hugging Face, Fine-tuning, open ai, kimi k2, Llama 3, Mistral
- **Data Visualization:** Excel, Tableau, Power BI, Streamlit
- **Software Engineering:** Python(OOP), CI/CD, Docker, Flask, FastAPI
- **Web Scraping:** Selenium, BeautifulSoup
- **Business Domains:** Marketing Analytics, Financial Reporting, Sports Analytics

Work Experience

AI Engineer – PredictiveLabs (Financial Sector)

Remote | Jun 2025 – Present

Project Finespresso : trading signals (news + market data)

- Built end-to-end pipeline combining news scraping, **yfinance** and **Polygon** for feature engineering to predict short-term stock movements.
- Benchmarked algorithms (Random Forest, XGBoost) with **LazyPredict**, then tuned via **GridSearch** and model optimization to target **>80% performance**; tracked experiments with **MLflow**.
- Integrated LLMs (Kimi K2, GPT-4o, GPT-4-Turbo) to enrich datasets by extracting sentiment, event context, and key entities from news headlines—enhancing feature sets and model interpretability before training and prediction.
- Conducted rigorous **backtesting** of models, evaluating **P&L, returns, and risk-adjusted performance**, incorporating confidence thresholds to optimize **profit-taking strategies**.
- Persisted features, models and results in **PostgreSQL**, and deployed inference + visualizations in a **Streamlit** app for traders.
- Skills & value: time-series & text feature engineering, reproducible model lifecycle, actionable trading signals for decision support.

Project AWS Data Engineering : ingestion, transform, LLM QA

- Architected cross-sector ETL (finance, sales, energy) into **Snowflake**, transformed with **dbt**, and orchestrated with **Airflow** for reliable pipelines.
- Integrated Bedrock LLMs (Kimi, Deepseek, etc.) for document summarization, automated QA/checklist generation and validation (RAG + DeepEval).
- Recorded model cost & performance in **MLflow** to enable cost-aware decisions; provided centralized analytics for stakeholders.

- Skills & value: scalable data platform design, LLM-based automation for QA, operational visibility (cost × performance).

Project Alpha Agents: AI Growth & Qual Agents Platform

- Developed and optimized **AI Growth Agent** and **Qualitative Agent** using multi-agent LLM pipelines for automated insight extraction.
- Designed **prompt-oriented workflows** using LLMs (Kimi, Llama-3, GPT) to generate actionable qualitative and quantitative outputs.
- Built a **Streamlit application** with secure PostgreSQL integration for agent orchestration and result visualization. Delivered scalable deployment on **Render**, ensuring reliable API + frontend performance.
- **Value:** Demonstrated end-to-end agent development, LLM reasoning optimization, and production-ready deployment.

Freelance AI/Data Engineer - UPWROK (Top Rated) Collaborative, May 2025

Remote | Jan 2025 – Present

- **Fine-tuned a GPT-4-mini model** to emulate a strategic AI assistant for digital creators (Gage), focusing on brand deals, monetization, and mindset; built a sample JSONL dataset with tone, structure, and fallback handling. Collaborated with a fellow engineer via Upwork.

Independent, Jan 2025 – Mar 2025

- Analyzed U14 match videos to generate **player performance and scouting reports**.
- Extracted visuals and computed custom metrics (passing accuracy, duels won, movement heatmaps) to **benchmark players** and compare performance against opponents.
- Identified key tactical insights and highlighted **best players from opposing teams** using data-driven evaluation.
- Tools & Skills: Python, OpenCV, Pandas, Matplotlib, Football analytics, Video analysis, Scouting KPIs

Independent, Jan 2025 – May 2025

- **Designed and delivered live online courses** on Probability & Statistics (Python) and Web Scraping for 10+ students, including hands-on projects and guided mentorship.

Data Science Engineer – 4InaTechnology (Energy Sector)

Manouba, Tunisia | Feb 2024 – Aug 2024

- Designed an **ETL pipeline** to collect sensor data from **STM32 microcontrollers**, processed it with **Flask**, and stored results in **Firestore** using Firestore and Realtime Database for scalable deployment.
- Built **time-series forecasting models (LSTM, ARIMA)** for energy consumption prediction.
- Developed **AI-driven chatbots & dashboards** using Flask & Flutter for real-time analytics.
- Applied **CNN models** for image classification in energy monitoring systems.

Machine Learning Intern – Innov-Sys

Tunis, Tunisia | Feb 2023 – Aug 2023

- Developed a **fitness e-coaching app** using Kivy & MediaPipe (pose estimation).

- Optimized user experience with **LSTM-based motion analysis**.

Projects

AI-Driven Football Player Performance Analysis (Big Data & AI | Nov 2024)

- Designed an **ETL pipeline (Airflow)** to automate ingestion of Bundesliga/FBref data into BigQuery.
- Developed AI analytics using **xG, market value KPIs, and Mistral LLM** for scouting insights.
- **Tech Stack:** Python, Airflow, BigQuery, Mistral LLM, Pandas

Sentiment & Toxicity Analysis (NLP + Data Engineering | Sept 2024)

- Scraped social media data using **Selenium** and stored in **MongoDB**.
- Deployed a **FastAPI backend** with Docker for real-time classification using Hugging Face models.
- **Tech Stack:** Python, Hugging Face, FastAPI, Docker, MongoDB

Education

🎓 **Master of Data Science** | University of Bizerte | 2021–2023

🎓 **Bachelor of Applied Mathematics** | University of Bizerte | 2018–2021

Certifications

INTRODUCTION OF AI – UNIVERSITY OF HELSINKI

PWC SWITZERLAND - POWER BI JOB SIMULATION – FORAGE

INTRODUCTION TO MLFLOW – DATACAMP

WEB SCRAPING IN PYTHON – DATACAMP

Languages

- **English:** Fluent EFSET Certification C1 | **German:** Intermediate A2
- **French:** Fluent | **Arabic:** Native
